**Workshops and Corresponding Convenors**

W1	Creating Concise & Compelling Fact Sheets to Amplify your PICES work.
W2	Sharing Capacity and Promoting Solutions for Marine Ecosystem Sustainability within the UN Decade of Ocean Science * 1 day Session / 1 day Workshop
W3	International Workshop on Solutions to Control HABs in Marine and Estuarine Waters
W4	Changing social-ecological-environmental system of the North East Asian Marginal Seas: new challenges for integrative marine science
W5	Bio-indicators of meso to global scale marine pollution: techniques for integration and standardization
W6	Developing an integrative conceptual framework of urban impacts on marginal ocean ecosystems
W7	Integrating biological research, fisheries science and management of flatfish species in the North Pacific Ocean in the face of climate and environmental variability
W8	Nurturing future generation in fisheries and marine environment science: Collaboration with PICES and Asia Fisheries and Marine Environment Leaders Program (AFIMA Leaders Program)
W9	Indigenous and Community-Led Approaches to support climate change adaptation and Ecosystem Resilience in the North Pacific and Arctic
W10	Towards climate-informed ecosystem-based fisheries management by building international collaborations and standardizing indicators
W11	Science advances needed to understand our "new ocean"

**Topic Sessions**

S1	Connecting Science and Communities for Sustainable Seas
----	---

S2	Applications of Deep Learning Systems in Marine Science
S3	Responses of Small Pelagic Fish to Extreme Events in Pacific Ecosystems
S4	The Oceanographic, Ecological and Societal Impacts Arising from Extreme Weather and Climatic Events in Coastal Regions
S5	Multi-scale ocean processes and their impacts on marine ecosystems
S6	The complex reality of managing Non-indigenous Species (NIS) in the North Pacific
S7	Ocean acidification and deoxygenation in ocean margin ecosystems: causes and consequences for ecosystems and fisheries
S8	Session on the Occurrence and Ecological Impact of Emerging Pollutants in the Coastal Marine Environment
S9	Understanding the implications of body size change for stock productivity and fisheries management
S10	Improved detection and understanding of factors affecting changes in North Pacific forage communities and implications to ecosystems
S11	Anticipated and realized effects of climate change on predatory fish, birds, and mammals of the North Pacific
S12	Shining Light on Essential Fish Habitat in Data-Limited Pacific regions
S13	Operational forecasts to improve recruitment prediction in fish stock assessments
S14	Seamount biodiversity: vulnerable marine ecosystems (VMEs) and species associated with seamounts in the North Pacific Ocean

Special Session: The International Pacific Halibut Commission (IPHC): 100 years of science-based fishery management
