PUBLISHER
Cambridge Scholars Publishing
is an independent academic publisher, committed to providing a forward-thinking publishing service that champions original thinking, whilst ensuring that our authors put the heart of everything they do.

They are unique in the balance they establish between their editorial guidance and the level of control retained by each of our authors; acknowledging the value they place on presenting their own work in a way that retains the integrity of their original argument.

With a strong reputation for author satisfaction, they understand the importance of making the publishing process a rewarding experience, with no cost to the author/editor, complimentary copies, a substantial author discount, free access to their eBook titles, and a generous royalty scheme.

Their publications are marketed worldwide and sold through international bookstores and distributors including Amazon, Blackwell, Baker & Taylor, Ingram, and are widely purchased by academic libraries. In addition, they have distribution partnerships in key geographical territories such as the USA, China, India and the Middle East.

The International Editorial Advisory Board is chaired by Professor Emeritus David Weir and consists of established scholars and leading edge thinkers, who play a key role in helping them to steer their commissioning focus.

Dr. Richard Baumgin

C.M., O.B.C., Ph.D., D.Sc., F.R.S.C.

is Emeritus Scientist at the Pacific Biological Station in Nanaimo, B.C. where he served as the Head of the Groundwater Section from 1977 to 1995 and as Director from 1988-1993.

He retired in 2017 and Dr. Baumgin has been honoured with a number of awards including the Order of Canada and the Order of British Columbia, the W. J. Gordon Award of the Royal Society of Canada and became the first foreign scientist to be made an Honorary Member of the American Fisheries Society. He was inducted into the 2007-2008 G燕dina, Poland presented him with the Gem Medal for outstanding scientific research. The Department of Fisheries and Oceans awarded him their Pro Di Oceano and he has been awarded the Queen's Golden Anniversary Medal and in 2008 was awarded the Order of Vancouver as an Honorary Doctor of Science degree from Vancouver Island University.

His research interests have included the discovery of acid rain in the Americas, the study of the fisheries of the North Pacific, the discovery that many species of fish were much older than previously thought and the hagfishes and lampreys. He has authored or co-authored a number of papers on the effects of climate on fish populations and was one of the first scientists to write about climate regimes and regime shifts. He has published over 350 articles and videos and has contributed to the book "The Sea Among Us - The Amazing Strat of Georgia." He is an Editor for the "Transactions of the American Fisheries Society" and was the editor of the editorial board of "Taxon Timo."
