

ICES at PICES 2005

Adi Kellermann

Head of Science Programme

**International Council for the Exploration
of the Sea (ICES), Copenhagen, Denmark**

ICES at PICES 2005

Events for Joint Action

ICES invites PICES to Co-Sponsor the following:

Symposium 2006

The Humboldt Current System: climate, ocean dynamics, ecosystem processes, and fisheries (Lima, Peru, Nov.)

Symposium 2007:

Marine Bioinvasions, Boston MA, USA (May)

Symposium 2007:

4th Zooplankton Production Symposium, Japan (May)

ICES at PICES 2005

Events for Joint Action

More symposia...

Symposium 2007

Marine Protected Areas (Spain, September)

Symposium 2008:

Effects of Climate Change on the World Oceans Spain, spring)

Symposium 2008:

Herring: biology, ecology and status of populations in the context of changing ecosystems

ICES at PICES 2005

Events for Joint Action

More symposia...

Symposium 2008 or 2009

Marine mortality of Salmon

ICES at PICES 2005

Events for Joint Action

...and there are opportunities for the following events:

Symposium 2007

2nd Young Scientists Conference

Symposium 2008:

International Polar Year

ICES at PICES 2005

2006 ASC, Maastricht, The Netherlands: Theme Sessions of interest?

Harmful Algae Bloom Dynamics; Validation of model predictions (possibilities and limitations) and status on coupled physical-biological process knowledge

Large-scale changes in the migration of small pelagic fish and the factors modulating such changes

Climatic variability in the ICES area – 2000–2005 in relation to previous decades: physical and biological consequences

ICES at PICES 2005

2006 ASC, Maastricht, The Netherlands: more Theme Sessions...

**Selected results from the “Census of Marine Life”:
preparing the ground for the 2007 Young Scientist
Conference focusing on taxonomy and genetics diversity**

Operational Oceanography

Human Health Risks and Marine Environmental Quality

ICES at PICES 2005

2006 ASC, Maastricht, The Netherlands: more Theme Sessions...

Spatio-temporal characteristics of fish populations and their environmental forcing functions as components of ecosystem-based assessments

The ecosystem approach: what's the impact on marine science, science based advises and management of marine ecosystems.

Evolutionary Effects of Exploitation on Marine Resources

ICES at PICES 2005

2007 ASC, Helsinki, Finland: Theme Sessions of interest -

Applications of passive sampling devices in environmental monitoring, assessment, research and testing

Marine biodiversity: a fish and fisheries perspective

Marine biodiversity and ecosystem functioning

Methods and comparisons for plankton field sampling and analysis, particularly use of image acquisition and analysis technology

ICES at PICES 2005

2007 ASC, Helsinki, Finland: more Theme Sessions...

Monkfish across the world: common problems and common solutions

Impact of anthropogenic noise on marine organisms

ICES at PICES 2005

Thank you!
